Melamine Particle Board is also called melamine faced chipboard. It' s a combination of [plain particle board](#) and melamine paper. A hot press process has been gone through to make this product. It' s specially used to manufacture furniture like office and lab furniture, cabinets, wardrobes, book shelves and they mostly modern furniture. The final products is paint free so it' s enviroment friendly compared with solid wood and plywood furniture. We are a manufacturer of melamine particle board in China.
